motivation

Objective

I am versed in 5 programming languages. Python, Java, JavaScript, HTML, CSS, C++. In the long term, I have set a goal to expand my experience in the programming field. Gaining more skills in my field will improve my job performance and satisfaction, which in the future will lead me to new trajectories in programming. Plus expanding my coding skills. Great at communicating and working with teams and a creative problem solver capable of approaching most problems at the basic level and working on up to solve the problem at all levels.

Intellectually curious and detailed oriented to offer critical thinking and strong interpersonal skills with all that I associate with.

Experience

February 2018 - Current

Data Collection • Bridges

- Entering Data collected from consumers that was generated.
- Built tool for collecting and storing generated data using python.
- Collaborated with my colleagues in recording events by the consumers. The information was used in billing.
- Developed experience in web applications

July 2007 – December 2017
